

# TAS subscale scores across VVIQ groups in Monzel et al. (2024)

$N_{\text{Aphant.}} = 30$  ,  $N_{\text{Typical.}} = 75$

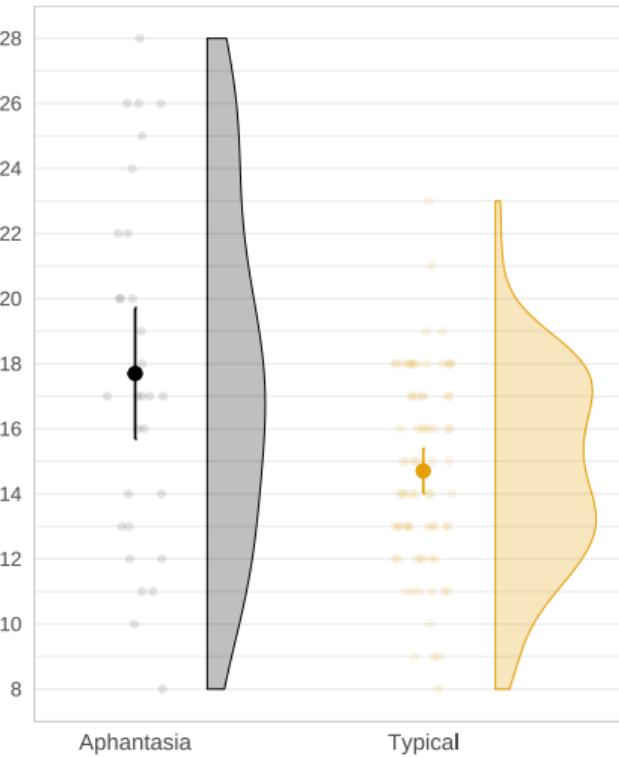

Difficulty identifying feelings

Difficulty describing feelings

Externally oriented thinking

Data from Monzel et al. (2024) only, because Burns et al. (2024) data did not include sub-scale scores or individual item scores. I may contact Edwin for this if I have time.
